

Intelsat Achieves Support of Nearly 75% of Funded Debt on Comprehensive Financial Restructuring

Key Creditor Groups Agree to Vote in Favor of Amended Plan of Reorganization

Path to Emergence by End of 2021, with Company's Debt Reduced by More Than Half

MCLEAN, VA – August 24, 2021 – Intelsat S.A. (OTC: INTEQ), operator of the world's largest and most advanced integrated satellite and terrestrial network, today announced that it has achieved the support of key creditor groups across the capital structure on the terms of a comprehensive financial restructuring that would reduce the Company's debt by more than half – from nearly \$15 billion to \$7 billion – and position the Company for long-term success.

The Company has filed an Amended Plan of Reorganization in its Chapter 11 proceedings pending before the U.S. Bankruptcy Court for the Eastern District of Virginia, Richmond Division, accompanied by an explanatory Disclosure Statement. The Amended Plan has the support of holders of approximately \$11 billion, or nearly 75%, of the Company's funded debt. These supporting creditors have executed a Plan Support Agreement that binds their support for the Company's Amended Plan.

The Company is seeking Court approval of the Disclosure Statement and to establish procedures to solicit votes on the Amended Plan at a hearing scheduled for September 1, 2021.

Today's filings and the widespread consensus in support of the Amended Plan help to achieve completion of the financial restructuring process and the Company's emergence from Chapter 11 by the end of 2021. The Amended Plan provides that Intelsat will emerge as a private company, with the support of new equity owners, to best advance its strategic objectives and accelerate its growth trajectory, with a path to becoming publicly traded again at some point in the next five years.

Over the course of the financial restructuring process, Intelsat has advanced on a number of technological innovations. Intelsat is leveraging its unparalleled global orbital and spectrum rights, scale, and partnerships to build the world's first global 5G satellite-based, software-defined, unified network of networks. The Intelsat network will be capable of supporting virtually any access technology, enabling the next generation of global mobility, IoT, and 5G services with never-before-seen simplicity, coverage, economics, and performance.
